[Report a data error here](#)**Abstract of DE10145104**

Data is entered for a digitized model of a denture (5). An inner surface (9) of a surface model is treated with a preset offset value to create a cement gap (7,8) between the denture to be produced and a tooth-stump (1,2). A computer program works out how to process a blank or a mold by means of a machine tool.
